ENGLISH	Chapter – 1 The Third Level Chapter - 4 Journey to the End of the Earth	<ul style="list-style-type: none"> The students will be able to know the meaning of ‘escapism’- a psychological refuge from the grim realities of the present day world along with a desire to stay with the past. The students understand about the climate change and how to make earth a better place to live in. 	Writing Skill and Activity – Invitations and Replies
BIOLOGY	Principles of inheritance and variations	<p>Learners will be able to understand the</p> <ul style="list-style-type: none"> Concept of Mendelian genetics. Various attributes of mendelian and chromosomal disorders. Blood groups and their role in various organisms. Role of mutation and its effect can be studied. Family diseases can be studied with the help of pedigree analysis charts 	<p>To find out the differences between mendelian and chromosomal disorders .</p> <p>To find out diseases with pedigree analysis charts .</p> <p>Comparison of various mendelian traits.</p>
CHEMISTRY	CHAPTER 10 - HALOALKANES AND HALOARENES	<ul style="list-style-type: none"> Learners will be able to Know how to write the trivial and 	Worksheets And NCERT

**CHAPTER 11-
Alcohols, Phenols and
Ethers**

**CHAPTER 14-
BIOMOLECULES**

IUPAC name of Haloalkanes and Haloarenes, the methods of preparation Haloalkanes and Haloarenes, the Physical and chemical properties and nature of C-X bond in haloalkanes and haloarenes

- Know the mechanism and stereo chemistry involved in nucleophilic substitution
- Understand the different types of isomerism in coordination compounds

Learners will be able to :

- know Nomenclature, methods of preparation, physical and
- chemical properties (of primary alcohols only), identification of primary, secondary and tertiary alcohols, mechanism of dehydration.
- Understand the Phenols: Nomenclature, methods of preparation, physical and

Activity File On All The Mechanisms Worksheets And NCERT

		<p>chemical properties, acidic nature of Phenol and ethers electrophilic substitution reactions, uses of phenols.</p> <ul style="list-style-type: none"> • Learner will be able to: • Classify (aldoses and ketoses), monosaccharides (glucose and fructose), D-L configuration • Explain - amino acids, peptide bond, polypeptides, proteins, structure of proteins - primary, secondary, tertiary structure and quaternary structures (qualitative idea only), denaturation of proteins. Nucleic Acids: DNA and RNA 	<p>Drawing Structures Of Monosaccharides, Dna Worksheets And NCERT</p>
PHYSICS	<p>Ch 5 Magnetism and Matter</p> <p>Ch 6 Electromagnetic induction</p>	<p>Learner will be able to</p> <ul style="list-style-type: none"> • understand the different kinds of magnetic material and earth's magnetic field. • Students will learn about the different method to induce an emf in a given 	<p>Worksheet and NCERT</p>
